What is LPR and how does it Work:

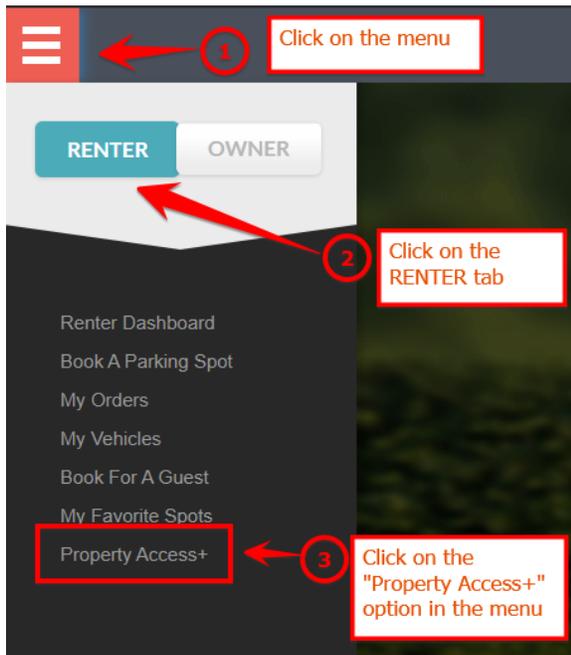

LPR stands for License Plate Reader. This means that you will be able to simply drive up to the entrance and exit garage door and it will automatically grant you access by our cameras reading the accurate license plate information in our system.

Every order you make at this property will require vehicle info with accurate license plate information. Please make sure your license plate is readable and that you drive slowly toward both the entrance and exit at the property for our cameras have the best results.

How to use Access+:

What is Property Access+? Property Access+ provides you the ability to use the app to operate the pedestrian & garage doors at the property via the ParqEx app.

This functionality will be the main way to open the pedestrian doors to access the property and it also serves as an alternate way to operate the garage doors. This option is especially useful in the scenario that your license plate is not correctly read by the LPR cameras, due to dirt or snow for example.
